SUMMARY

A React.js front-end developer creates user interfaces and interactive features using the React.js library. They collaborate with designers and back-end developers to implement user-facing components, ensure high performance, and maintain code quality. Additionally, they may be involved in optimizing applications for scalability and responsiveness across various devices and browsers. Strong proficiency in JavaScript, React.js, HTML, and CSS is typically required, along with familiarity with state management libraries like Redux and component-based architecture. Communication skills and the ability to work effectively in a team are also valuable for this role.

TECHNICAL SKILLS

- Java
- Spring Boot
- HTML
- CSS
- JavaScript
- React.js
- Node.js
- MySQL
- Mongo DB

SOFT SKILLS

- Continuous learning and adaptability to new technologies,
- Time management,
- Problem-solving involves the ability to come up with alternative solutions,
- Perform effectively in a deadline environment.

CAREER ACHIEVEMENTS

- Smart India Hackathon, 2022 - Finalist

LANGUAGES

- Tamil
- English
